MISSION STATEMENT

EcoHealth Alliance leads scientific research into the critical connections between human, animal, and environmental health. We develop solutions that prevent pandemics and promote conservation.
About EcoHealth Alliance

For five decades, the work of EcoHealth Alliance has informed public health and conservation practice globally.

EcoHealth Alliance practices a One Health approach, incorporating the needs of humans, animals, and the environment in all dimensions of our work. This guiding principle allows EcoHealth Alliance to promote environmental stewardship and to perform comprehensive and impactful research without having to decide between conservation and human needs. We are building a healthier and more sustainable future for all living things, by researching the ways environmental, human, and animal health intersect and complement one another.
